

YOU HAVE BEEN TESTED FOR COVID-19, NOW WHAT?

If you are not having symptoms of COVID-19:

- If you are awaiting results from routine screening, but have no symptoms and have not been a close contact of a confirmed case, you may return to your normal activities. Check with your employer for return to work guidance.

If you have symptoms of COVID-19:

- While waiting for the results of your test, your household contacts should stay at home. (If household contacts are healthcare workers, they are encouraged to contact their employer. They may still be allowed to work while wearing a mask).
- Stay in a specific room and away from other people in your home to the extent possible. Use a separate bathroom, if available. Household members may consider staying in a separate location, if available, to decrease their risk of exposure.
- If you must leave home, such as to seek medical care, wear a face covering.
- If you test positive for COVID-19, you will receive a phone call from a contact tracer. You will need to isolate for at least 10 days from the date of your test AND symptoms have significantly improved AND you have been fever-free without the use of a fever-reducer for at least 24 hours.

When will I receive my test results?

You will receive a phone call from the Elko County Public Health Office. Test results can take up to 7 days.

If you have any questions about COVID-19 or your test results (after the 7 days), please contact the COVID-19 hotline at 775-777-2507.

If you become symptomatic and need to be tested please contact your health care provider, the COVID-19 Hotline, or Medallus Urgent Care at 775-400-1510. Medallus Urgent Care is currently offering free testing.
